

 **FLASH PD**

FASTER INSIGHTS. SMARTER INVESTIGATIONS.

# Overview

Flash PD is an AI-powered investigative intelligence and case management platform built for modern law enforcement. It eliminates information silos by ingesting, organizing, and analyzing evidence of any format or size, compiling **audio, video, documents, and digital records** into a single secure system.

By combining cutting-edge transcription, intelligent keyword detection, cross-evidence analysis, and AI-driven behavioral insights, Flash PD enables agencies to move from fragmented data to actionable intelligence in minutes, supporting investigations from intake to case resolution.

## Core Purpose

### Analyze

Flash PD processes all forms of case evidence—video, audio, and text, automatically identifying key moments, critical statements, contradictions, and behavioral cues.

### Train

Flash PD functions as a continuous training center and knowledge base, allowing detectives to learn from real cases, historical investigations, and AI-generated insights. Officers can review patterns, refine strategies, and study behavioral cues to strengthen investigative skills and standardize best practices across the department.

### Generate Work Product

Flash PD generates structured reports, summaries, timelines, and exports in seconds, significantly reducing workload while maintaining accuracy, consistency, and auditability.

# Key Features

## Unified Evidence Intake

Flash PD accepts and processes all forms of evidence, eliminating the need for separate tools or systems:

- Interrogation room footage
- Body-worn camera recordings
- Jail cell and phone call audio
- Financial information
- Phone extractions
- Witness statements and written reports
- Digital records, logs, and text-based evidence

## Unlimited Evidence Ingestion\*

Flash PD is designed to provide immediate impact, no matter the size or scope of investigations:

- No file size restrictions for supported subscription tiers
- Simultaneous processing of multiple evidence sources
- Built to analyze cold cases, long-term investigations, and multi-agency operations with extensive evidence volume

*\* Actual upload capacity determined as part of the procurement process*

## AI-Powered Evidence Analysis

Flash PD's AI analysis instantly scans all evidence to accelerate review and uncover critical insights:

- CJIS-compliant transcription with speaker diarization
- Intelligent keyword detection for names, locations, and case-relevant terms
- Audio analysis across video, body cam, and call recordings
- Automated timestamping for instant navigation to critical moments
- Cross-statement contradiction detection to surface inconsistencies

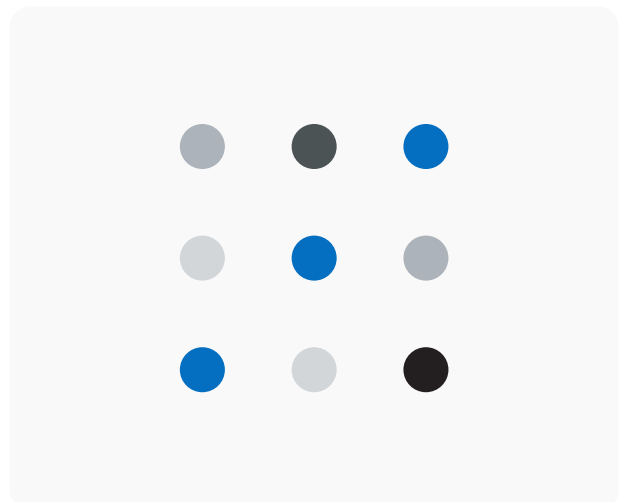

## AI Chatbot Case Assistant

- Enables natural-language interaction with case evidence
- Responds with direct answers, timestamp references, and linked supporting excerpts
- Provides investigators with on-demand insights, summaries, and organized case perspectives

## Psychological & Behavioral Analysis

- Detects tone shifts, hesitation, and potential deception markers within interviews and calls
- Identifies emotional triggers, and body language cues from recorded interactions
- Adds a new layer of insight beyond traditional transcription or keyword search

# Flash AI Product Demonstrations

Visual examples showcasing key capabilities of the Flash AI platform.

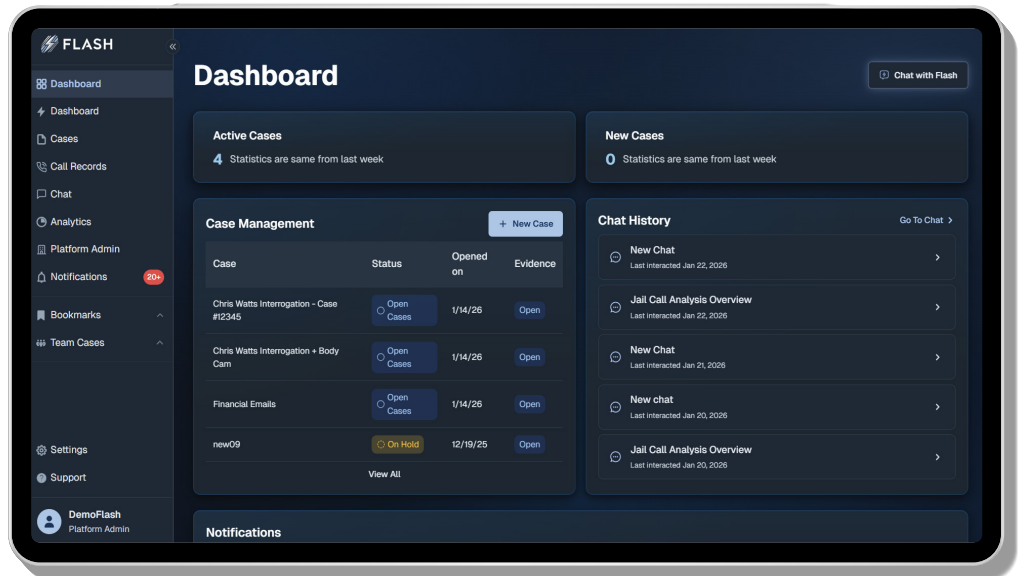

## Dashboard

This Dashboard shows:

- General system overview (Active Cases, New Cases, Completion Rate, and Performance Accuracy)

Quick access sections:

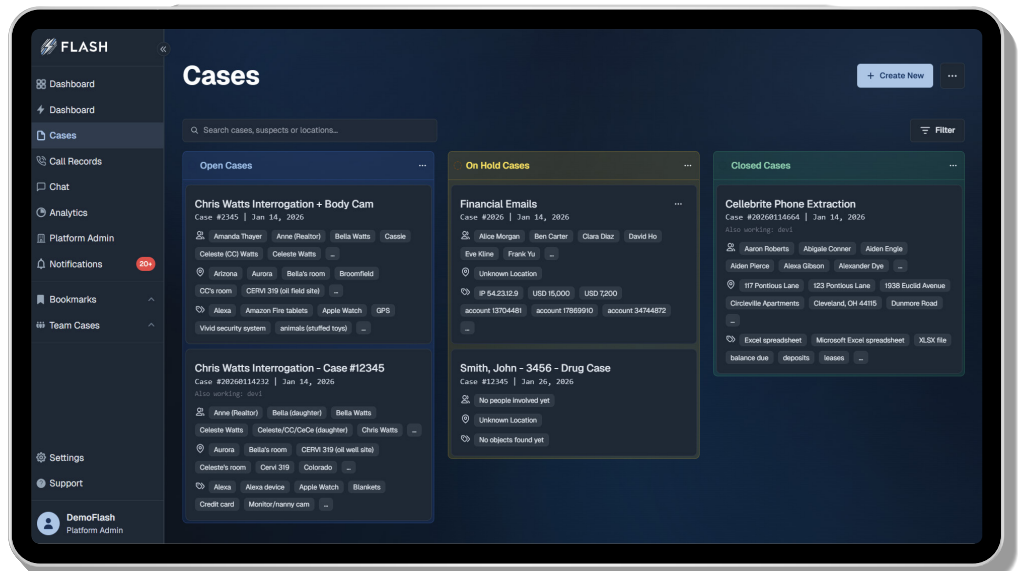

- Case Management (View recently created cases)
- Alerts or updates in the Notifications panel (if applicable)

## Case Files Upload & Analysis

Key functions:

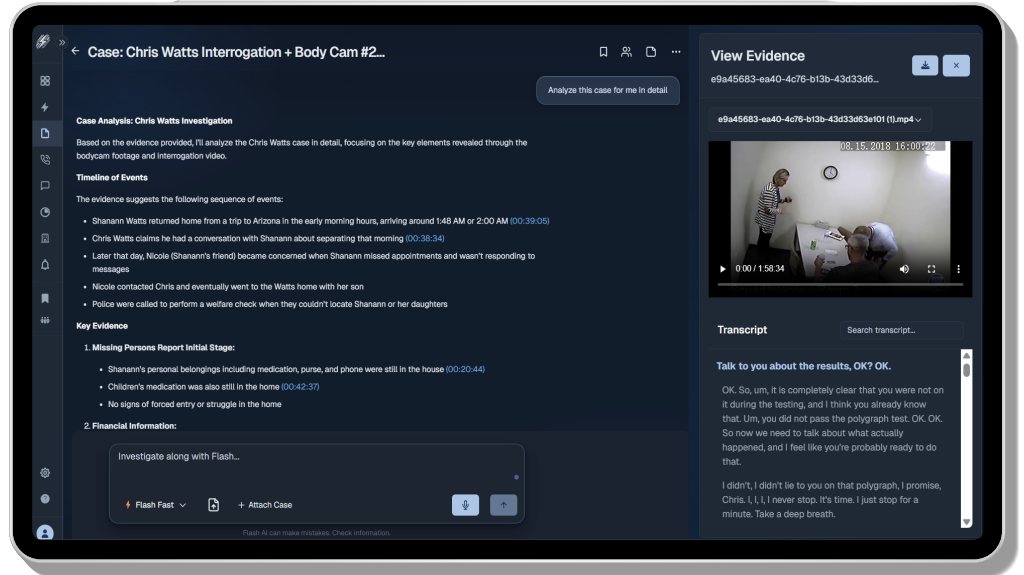

- Create new cases
- Open existing cases
- Access Flash's AI assistant for that case

# Evidence View

Key functions:

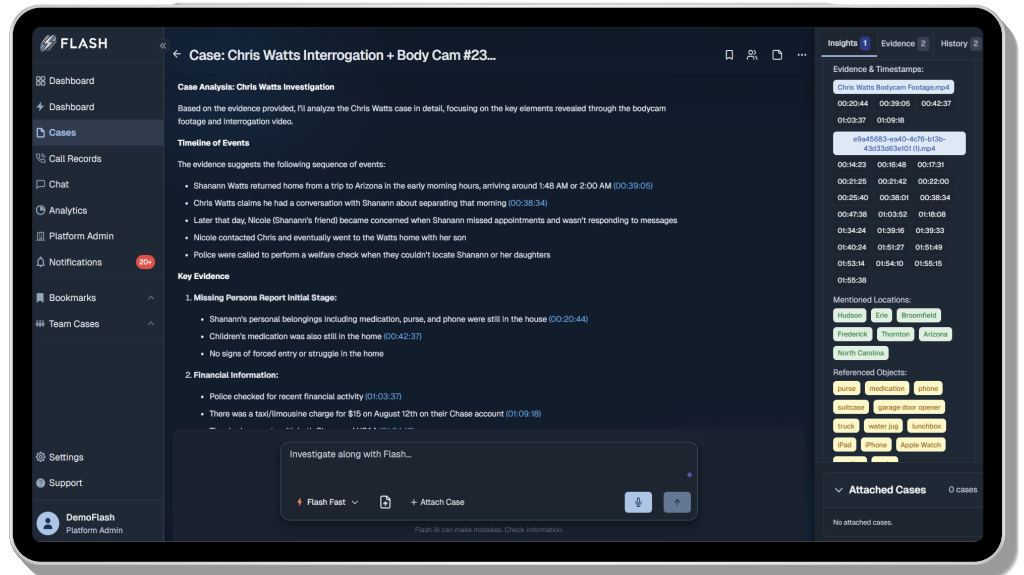

- **Human-in-the-Loop by Design:** Investigators remain in control with AI insights shown alongside original evidence.
- **Instant Context, One Workspace:** Generate answers directly within the evidence review workspace.
- **Built-In Traceability:** Link every insight to its source for instant verification and confidence.

# AI Chatbot Feature

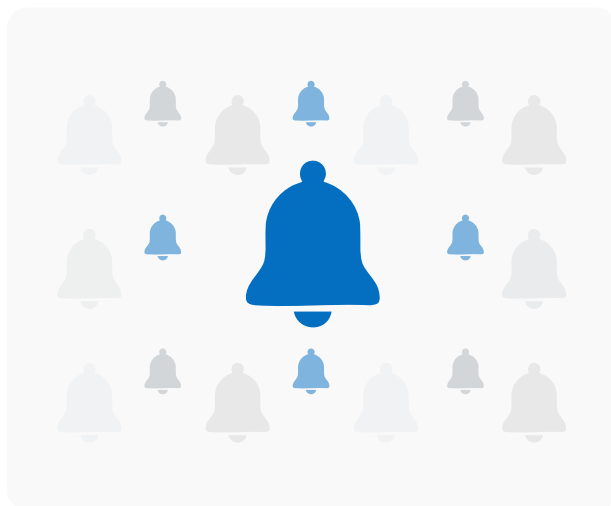

Key functions:

- Provide automated, real-time responses to user questions and requests
- Understand and route inquiries using natural language processing
- Offer secure access to case, inmate, or system information based on user role
- Log interactions, provide summaries, and integrate with existing workflows or systems

## Secure and Compliant

- CJIS-compliant for sensitive law enforcement data
- Hosted on AWS GovCloud, designed for government and criminal justice workloads
- End-to-end encryption ensures evidence is protected both at rest and in transit
- 2FA at time of login

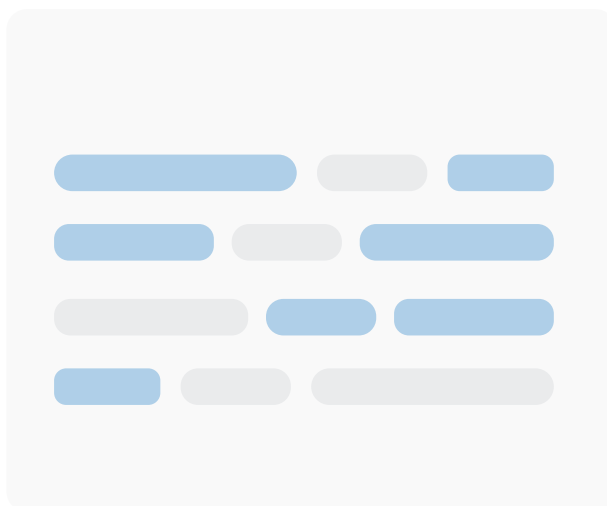

## Automatic Notifications

Flash PD keeps your team informed and accountable with real-time alerts for key case activity. Notifications are sent when:

- Notes or updates are added to a shared case, keeping everyone aligned on new insights
- Cases or evidence are deleted, ensuring auditability and accountability across the team
- Reports are shared with other officers or departments, guaranteeing timely access to critical findings

## Report and Timeline

- **Automated Reports and Timelines:** Flash PD converts case evidence into structured editable reports and timelines with key events, transcripts, and AI insights
- **Flexible Sharing Export:** Customize summaries for internal review or cross-department collaboration, and easily exported in multiple formats

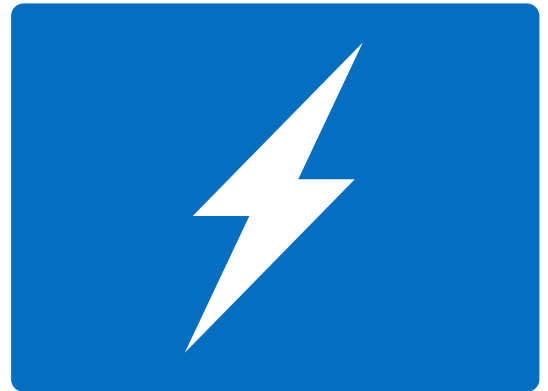

# Why Flash PD Stands Out

Compatible with  
**Cellebrite files**

Processes **all evidence formats** in one unified platform

Handles **unlimited uploads** without slowing down or losing accuracy

Speeds up review with  
**keyword search and timestamp navigation**

Ensures human oversight through  
**officer review workflows**

“

# Real Agencies. Real Impact.

## Transforming Case Management

Investigators spend countless hours on paperwork and evidence organization. Flash AI automates these tasks so agencies can focus on solving cases.

“ On the actual paperwork side of everything, I would say it saves about 50% on average caseload time.”

— Whitehall Police Department

## Speed When It Matters Most

In active investigations, every minute counts. Flash AI enables investigators to answer critical questions in seconds, not hours.

“ It took us in real-time 32 minutes to find out which county a crime happened in. When we used Flash, it took about 30 seconds.”

— Chief, Muskingum County Sheriff's Office

## Built Different

Law enforcement agencies have tried other AI tools. Flash AI stands apart.

“ I haven't used anything else—AI—that has been able to do exactly what Flash has been able to do.”

— Detective, Whitehall Police Department

# Affiliations and Current Work

## Pilots

---

**Ohio Bureau of Criminal Investigation (BCI)**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

**Whitehall Police Department**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

**ODRC (Warren Correctional Facility)**

Utilizing Flash Jail Call Analysis to screen 1.5 million minutes of calls monthly

**Ohio State Auditors**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

**Perry Township Police Department**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

**Muskingum County Sheriff's Office**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

**Guernsey County Sheriff's Office**

Utilizing Flash PD to manage cases, analyze evidence, and streamline investigative workflows

# FLASH PD

## PRICING

FASTER INSIGHTS. SMARTER INVESTIGATIONS.

# THE FIRST | 48

In Law Enforcement, the first 48 hours after a crime are crucial to the outcome of an investigation. At Flash PD, we believe strong and effective partnerships are forged early. That's why we offer a **free 48 Day pilot** of Flash PD, the latest tool in Law Enforcement. Our priority is to equip law enforcement officers with the tools of tomorrow, to make a real impact today.

## DURING THE FIRST 48, WE WILL:

- ✓ Train officers to use Flash PD to augment their investigative skills, not replace them
- ✓ Provide data upload and analysis beyond normal investigative workloads, so your organization can see the full potential of Artificial Intelligence in investigations
- ✓ Assign a Flash Support Rep to your organization, giving your officers immediate access to technical assistance

*Artificial Intelligence is changing the landscape of Law Enforcement.  
Put your department ahead of the pack and start the First 48 today.*

**Artificial Intelligence** is changing the landscape of Law Enforcement. Put your department ahead of the pack and **start the First 48 today.**

# DEPLOYMENT TIERS

## Respond

**\$3,000**  
/ Month

**+ \$100 / Seat**  
(ONE INCLUDED)

- ✔ For organizations seeking foundational artificial intelligence support
- ✔ Supports AI analysis of evidence within individual cases
- ✔ 100 GB of evidence upload and analysis, typically supporting dozens of standard investigations or ~8-12 high-complexity cases\*

## Investigate

**\$5,000**  
/ Month

**+ \$100 / Seat**  
(ONE INCLUDED)

- ✔ For organizations seeking comprehensive artificial intelligence support
- ✔ Supports AI analysis of evidence across multiple cases
- ✔ 250 GB of evidence upload and analysis, typically supporting sustained, high-volume investigative workloads, including dozens of concurrent standard investigations or ~15-25 high-complexity cases\*

## Command

**DEPLOYMENT  
SPECIFIC**

- ✔ For large, high volume departments or any organization seeking transformational and fully integrated artificial intelligence capabilities
- ✔ Custom data plan, specific to departmental needs
- ✔ Opportunities for customization and early access to new features

\*Evidence usage varies by case type. Standard investigations often include limited video evidence, while high-complexity cases may involve multiple devices, extended video, or sustained data ingestion over time.

# ADDITIONAL SERVICES

The following features are offered as optional add-ons and are priced separately from core Flash PD subscription plans.

## FLASH SIGNAL

- ✓ AI-powered jail call intelligence & risk triage
- ✓ Flash Signal provides an AI-driven jail call processing and analysis system, designed to help investigators quickly identify risk and extract actionable intelligence from recorded calls. The system ingests jail calls in real time or in limited evidence batches, automatically transcribing and analyzing each conversation
- ✓ Using advanced AI models, Flash Signal generates concise call summaries, flags relevant keywords, slangs, and tags conversations by risk level (high, medium, or low), enabling teams to respond to the most critical communications first

### KEY CAPABILITIES

- Real-time or batch ingestion of recorded jail calls
- Automatic transcription and concise call summarization
- Keyword, slang, and topic extraction
- AI-based risk scoring and call prioritization
- Bulk analysis across large call volumes
- Conversational AI interface for efficient review and exploration

### DEPLOYMENT OPTIONS

- Available as an add-on to existing Flash PD tiers
- May also be offered as a standalone feature depending on department needs

### PRICING

Structured based on facility-specific deployment scale and call volume

## FLASH GPT

- ✓ Secure AI access for your whole organization
- ✓ Flash GPT extends the power of AI to sworn officers and staff who don't need the full spectrum of Flash PD capabilities. While Flash PD can be a force multiplier for all sworn officers, Flash GPT provides secure, standard AI capabilities across your organization

### KEY CAPABILITIES

- Secure, department-controlled GPT environment
- Ability to generate simple reports, summaries, and documentation
- Same security and compliance standards as Flash PD

### IDEAL FOR

- Patrol officers
- Command staff
- Administrative and support personnel

### PRICING

Offered on a per-user basis:

- **Respond:** \$35 / Month
- **Investigate:** \$25 / Month
- **Command:** Determined by deployment scope and configuration

# WHAT HAPPENS NEXT

## SIMPLE 3-STEP FLOW:

- ✔ **Activate the 48-Day Pilot**  
Officers begin using Flash PD in real investigations with full support
- ✔ **Review and Right-Size**  
Flash PD and department leadership review usage, outcomes, and operational needs
- ✔ **Continue without Disruption**  
The department transitions directly into the appropriate subscription tier, using the same accounts, data and configurations
