

The Future of Investigation, brought to you in a Flash.

Flash is your AI-powered investigation assistant. From jail calls to body cam footage, Flash transcribes, cross-references, and analyzes your entire case file — surfacing insights in seconds. Less time digging, more time solving.

Key Capabilities:

⚡ AI Chatbot Assistant

Instantly answers investigative questions, cross-references evidence, and surfaces hidden connections.

⚡ Document Analysis

Processes Cellebrite dumps, financials, emails, and text messages, extracting critical leads and patterns.

⚡ Cross-Case Analysis

Connects all evidence across multiple sources and cases, surfacing links, patterns, and bigger-picture insights.

⚡ Video Analysis

Rapid analysis of interrogations, body cam, and dash cam footage, highlighting key moments and behavioral cues.

⚡ Inmate Call Analysis

Auto-transcribes inmate calls, flags suspicious conversations, and timestamps insights.

⚡ Link Analysis

Automatically extract, connect, and visualize entities in an interactive graph, enabling investigators to explore relationships across all data.

Why Agencies Trust Flash

CJIS Compliant

Secure handling of law enforcement data

Encrypted & Access-Controlled

Only authorized users can view sensitive evidence

AWS GovCloud Hosted

U.S. government cloud infrastructure

"It took us in real-time 32 minutes to find out which county a crime happened in. When we used Flash, it took about 30 seconds."

— Chief, Muskingum County Sheriff's Office
